

Kilby & Gayford - 21 April 2009

To whom it may concern,

I have been delighted to work with this company on the installation of a 350 tonne steel framed building under difficult site conditions in the Heart of London's Covent Garden.

Kevin Allbrighton has been proactive at all stages of the project and has been very helpful in dealing with the inevitable problems that arise on such projects.

The site operatives have demonstrated a high level of skill and have always reacted favourably to any requests made by my site management team.

I would have no hesitation in recommending this companies services and look forward to working with them on future projects

Martin Hickey
