Dear Mr. Archer,

**REF: STEEL BEAM REINFORCEMENT WORKS TO  
PRECIP ROOMS 1-4 RATCLIFFE POWER STATION**

We write to commend your Company on the successful completion of the above mentioned Contract for Eon UK Ltd. at Ratcliffe on Soar Power Station.

Despite the many constraints imposed upon you, which included limited working space and overnight working, you completed the contract on time and to the Client's satisfaction. This was largely due to the professionalism and dedication of the Archer site team, who were a pleasure to work with.

Furthermore your method of supporting, moving and installation of the steel beams over live electrical panels proved to be an inspired one and the "key" to the operation.

Finally, Eon operate a very strict and exacting Health & Safety regime which you successfully integrated into the eight weeks of your contract period.

Yours sincerely,  
for **G.F. TOMLINSON & SONS LTD.**

P. Garwood  
Site Agent
